PROFILE

Game Design undergraduate at Brassart, specialising in **Gameplay Programming** with **Unreal Engine 5**. I build gameplay systems and AI behaviours that meet design goals and technical constraints. Seeking an **internship from July 2027**, for 4 weeks to 6 months, in France or abroad.

TECHNICAL SKILLS

⌘ **Unreal Engine 5 / Blueprint Advanced**
Gameplay systems, architecture, **components and interfaces**.

◈ **Gameplay AI Advanced**
Behavior Trees, EQS, NavMesh, custom tasks and services.

✣ **Gameplay Physics Advanced**
Vectors, **forces, collisions**, impacts and movement.

⌕ **Debugging Advanced**
Diagnostics, **breakpoints**, bug fixes, testing and edge cases.

C# **C# / Unity Intermediate**
Gameplay feature development and fixes to existing code.

⑂ **Git Intermediate**
Branches, commits, merges, **pull requests** and conflicts.

▤ **Optimization Intermediate**
Timers, traces, event calls and stat unit.

▣ **UMG / Widget Blueprint Intermediate**
Functional UI connected to gameplay.

SOFT SKILLS

⚙ Analytical thinking
⟳ Willingness to rethink assumptions
◎ Perseverance
⌕ Technical curiosity

LANGUAGES

French — native

English — comprehension C1, production B2

PROJECTS

VORACE

In development · Gameplay Programmer · Narrative Design

Developed **gameplay AI** and helped build the game's narrative world.

- Designed and developed AI behaviours.
- Built AI with **Behavior Trees**, **EQS and NavMesh**, plus custom Blueprint tasks and services.
- Used **Primary Data Assets** to make tuning easier.
- Developed the setting, protagonist and faction motivations.

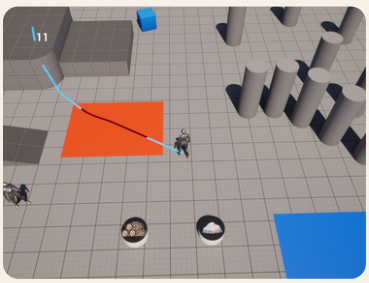

POUSS'PLOUF !

Party game · Gameplay Programmer

Local party game where two teams of two bouncing animals compete on an ice floe, trying to push each other into holes.

- Developed **physics-based movement** and tuned **game feel**.
- Prototyped **collision responses** and **impact calculations**.
- Iterated through playtesting to refine feel and stability.

CRPG PROTOTYPE

Solo project · Blueprint

- **Multi-mode camera** and **click-to-move** with **path preview**.
- NavMesh navigation, combat prototype, basic inventory and interactions.

EXPERIENCE

1 year — **Software Developer Apprentice — Arcade**
Maintained and extended a **C# application** for quarry truck loading. Diagnosed and **fixed bugs**, tested changes, and worked with Git branches, commits, pull requests and **code reviews**.

2016 - 2019 — **Seasonal IT Support — SDIS 34, Vailhauquès**
Installed and reinstalled Windows, replaced hardware, troubleshot software and resolved email issues.

EDUCATION

2024–2027 — **Bachelor's in Game Design — Brassart**
In progress.

2022–2023 — **Bachelor's studies in Education Sciences**
Two years completed.

2017–2020 — **DUT in Networks and Telecommunications — IUT de Béziers**
Diploma awarded.
